The Critical Work Infrastructure for the AI–Powered Workforce

🚀 What is Reejig WorkOS?

The Reejig Work Operating System is the **single source of truth for all work in an enterprise.**

It makes every role, process, task, and subtask visible, quantifies AI potential, and connects each task to the right Microsoft Copilot or agent for maximum ROI. Unlike static consulting studies, Reejig keeps the **work architecture continuously up to date** as work evolves and as agents are deployed.

It not only shows the work and where to place the right Copilot or agent, it also highlights the **impact on the workforce** — helping leaders prepare employees for pivots, reskill where needed, and plan the future skills required for AI adoption.

Think of it as the critical **work infrastructure for the AI-powered workforce** — live, accurate, and always improving.

The Data Behind It

23 industry models preloaded, covering every major sector.

Millions of data points across **roles, processes, tasks, subtasks, skills, time, and cost per task.**

Built from: **2M+ data points, 1.3M+ tasks, 2.4M+ subtasks, 3.9M+ actions, 400K+ skills.**

Day 1: Instantly maps 100% of a business's work with **80% accuracy out-of-the-box.**

Learns continuously from the customer's real patterns, reaching **92%+ accuracy within weeks.**

Automatically updates as work changes, ensuring visibility, Copilot deployment, and workforce planning stay current.

Lead Boldly. Transform Responsibly.
This is Zero Wasted Potential.

What It Delivers

① Work Made Visible

Complete, dynamic map of every role, process, task, and subtask.

② Work Intelligence

Finds waste, identifies where the greatest opportunities for AI exist, quantifies dollar-value ROI, and highlights automation vs augmentation potential.

③ Agent Orchestration

Matches every task to the right Microsoft Copilot, pre-built, or custom agent.

④ Workforce Evolution

Shows the impact of AI on jobs and skills, enabling reskilling, redeployment, and future workforce planning.

⑤ ROI Tracking

Measures how work changes over time and proves the return delivered by Copilot.

How This Works in Practice

Three paths for customers, depending on where they are in the journey:

① Start (5 Days to Value)

15 Roles - Proof of Concept
- **Scope:** 15 roles mapped to tasks, subtasks, and skills; with Microsoft Copilot and agent recommendations.
- **Funding:** Pre-sales ECIF
- **Price:** $30K

② Build (8 Weeks to Value)

2 Teams
- **Scope:** 2 teams (IT, HR, Finance, Sales, Marketing)
- **Funding:** MCI + Jumpstart
- **Price:** $50K

3 Teams
- **Scope:** 3 teams (IT, HR, Finance, Sales, Marketing (highest performing units)
- **Funding:** ECIF
- **Price:** $75K

③ Grow (3-6 months)

Scale from 2-3 teams to full department
- **Scope:** Full department
- **Funding:** ECIF
- **Contract:** 3 years
- **Price:** $250K per department
